Recommendation

Office Solutions should prioritize profitable growth instead of increasing sales across every product category.

- Prioritize high-margin products such as Copiers, Accessories, and Paper.
- Review loss-making categories, especially Tables.
- Focus bundle promotions in the West and East while limiting discounts above 30%.

This strategy can help Office Solutions improve sales quality, protect profitability, and support its 20% growth objective.

Sales by State and Region

West and East are the strongest sales regions and should remain priorities for growth and bundle promotions.

Sales Growth Action Plan

Prioritize

- Prioritize Copiers, Accessories, and Paper, which generated some of the strongest profit results.
- Paper and Copiers also show high profit margins, making them attractive products for targeted sales campaigns.
- Use complementary product bundles to increase order value while protecting margins.

Target

- Focus growth efforts on the West and East regions, which generated the highest sales: approximately \$725K and \$679K.
- Expand corporate account outreach because the Corporate segment contributed approximately \$706K in sales.
- Promote bundles to increase average order value and encourage larger purchases.

Control

- Review the Tables sub-category, which produced approximately \$17.7K in losses.
- Monitor Bookcases and Supplies, which also generated negative profit.
- Limit discounts above 30%, since this discount range produced negative overall profit in the historical dataset.

Limitations

Findings describe historical relationships in the dataset. They do not guarantee a 20% sales increase and should be tested with defined targets and follow-up measurement.
